Adugani Vanjari Akanksh | **24M2166**
Centre for Machine Intelligence and Data Science | **M.S. by Research**
Indian Institute of Technology Bombay | **Gender: Male**
DOB: 19/02/2001

Examination	University	Institute	Year	CPI / % Credits
Post Graduation	IIT Bombay	IIT Bombay	2027	9.15 **Core:** 28 **| Total:** 40
Graduation	IIT Tirupati	Indian Institute of Technology Tirupati	2022	8.61
Graduation Specialization: Electrical Engineering				
Intermediate	TSBIE	Sri Chaitanya Junior Kalasala	2018	95.50%
Matriculation	TSBSE	Sri Chaitanya High School	2016	9.5

Achievements

- Finished **Top 15** among **200+ UG/PG students** in **QRT QuantQuest**, **IIT Bombay** (sole PG team) *(2024)*
- Secured **2nd place** in **F.I.R.E.** (Flame Imaging Robot Extinguisher) technical event at **Tirutsava** *(2020)*
- Secured **2nd place** in **ArduiKnow Challenge**, a competitive microcontroller event at **Tirutsava** *(2020)*
- Secured **3rd place** in **Terrace Farming Robot** design contest among **23 IITs** at **Inter IIT Tech Meet** *(2019)*
- Won **1st place** in **The Line Following Robot** algorithm design event by **TechManiacs**, **IIT Tirupati** *(2019)*

Professional Experience

Software Developer (Backend) | *Paytm* *(Jan '23 - Dec '23)*
FSM & BINARY Teams, Paytm, India

- Architected hierarchical, location-based **feature-flagging** backend, accelerating product feedback loops by **35-40%**
- Developed dynamic **territory access controls**, incentivizing agent productivity to drive a **19% increase** in resolutions
- Engineered **API orchestration** to cross-reference KYC databases, reducing vendor onboarding friction by **32%**
- Designed load-balanced **round-robin** automated ticketing algorithm, saving team leads **15+ hours/week** of overhead
- Automated manual finance workflows by **90%** using efficient **1-SAP logic** to process **15M revenue records** monthly

Jr. Data Scientist | *Holmusk* *(Jun '22 - Aug '22)*

- Architected predictive patient outcome models within the **NeuroBlu** webapp using **XGBoost and LSTM** architectures to model structured clinical and longitudinal patient data, improving prediction accuracy for healthcare analytics
- Optimized dashboard backend using **Python**, reducing query latency from **20s to 2s** (**10x speedup**)

AI Research Intern | *Motilal Oswal Financial Services* | *Internship* *(May '26 - Aug '26)*
Align Before You Quantize: Time Series Tokenization

- Engineered **HALO** framework for **Leech lattice** time-series tokenization via geometric alignment for **AAAI**
- Reduced reconstruction MSE by **11.9%**(IN) & **2.8%**(US) via phased training, boosting codebook usage **3.89x**
- Enhanced downstream forecasting via discrete representations, achieving SOTA **IC** & cutting **MASE** by **7.5%**

Research Experience

PARAM 1 Indic-Scale Foundation Model | *BharatGen* *(Jan '25 - May '25)*
Guide: Prof. Ganesh Ramakrishnan, ***IIT Bombay***

- Developed **PARAM-1**, a **2.9B parameter** English-Hindi foundation model trained from scratch on **5T tokens**
- Processed **12TB text** via **NVIDIA NeMo**, deploying fastText classifiers & GPU-accelerated fuzzy deduplication
- Automated web scraping for archive.org via custom scripts, executing strict code/math filtration & **PII removal**

Key Projects

Implied Volatility Surface Forecasting *(Aug '25 - Aug '26)*
Master's Thesis | IITB Citadel Research Lab Project |(Submitted to 7th Int. Conf. on AI in Finance)

- Spearheaded research on no-arbitrage implied volatility surface forecasting using GANs and Diffusion Models, evaluating **AF-TransVol** and **AF-INO** architectures across **3,417 trading days** of NIFTY50 data
- Engineered **44 causal scalars** & **3 soft regimes** using scale-invariant log-IV transforms & (ρ, z) warping
- Enforced butterfly convexity & calendar monotonicity, achieving SOTA **5.30% MAPE** and $R^2 = 0.910$
- Slashed static arbitrage violations by $>$**50%** using stress-conditioned **AF-TransVol-Stress** extensions

Interpreting Emotion & Persistence Dynamics in LLMs | *Course Project* *(Jul '25 - Nov '25)*
Guide: Dr. Pushpak Bhattacharyya | CS 772 : Deep Learning for Natural Language Processing

- Traced emotion across four **Qwen2.5** LLMs via logistic probes, revealing separability peaks in mid-to-late layers
- Deployed Streamlit app mapping causal tokens via activation patching, token ablation & layer-wise noise injection
- Curated **7,000-sample** dataset and formulated decay protocol yielding **100+** token emotional half-life
- Fine-tuned transliteration via **LoRA**, hitting SOTA **15.0% CER** & **80.0% Word Accuracy** on noisy data

Multi-Task Image Restoration with LoRA-DINOv3 | *Course Project* *(Jul '25 - Nov '25)*

Guide: Dr. Biplab Banerjee | GNR 650 : Advance Deep Learning for Image Analysis

- Integrated frozen **DINOv3 ViT** backbone with **LoRA** & dual **PixelShuffle** decoders for joint upscaling
- Applied global residual learning with **VGG perceptual loss**, eliminating checkerboard artifacts effectively
- Executed curriculum unfreezing at epoch 10, achieving **31.22 dB PSNR** & **0.8424 SSIM** on DIV2K SR
- Preserved scene content across enhancements, attaining **16.80 dB PSNR** & **0.7635 SSIM** on MIT-Adobe-5K

Dense-Residual Transformer for Image Super-Resolution | *Course Project* *(Jan '25 - May '25)*

Guide: Dr. Biplab Banerjee | GNR 638 : Machine Learning for Remote Sensing II

- Architected **DRCT** networks utilizing **Swin-Transformers** & **0.2 residual scaling** to resolve deep bottlenecks
- Designed 3-phase progressive loss blending **L1, MSE, SSIM** across milestones to optimize edge quality
- Accelerated training via PyTorch **DDP** on 90/10 data splits, maximizing joint **40×SSIM + PSNR** metric
- Stabilized forward spatial information flow, preventing degradation & extracting sharp high-frequency textures

Other Projects

Tick-Ops: Quant Data Engine Evaluation | *Self Project* | *DuckDB, QuestDB* *(Jan '26 - May '26)*

- Benchmarked **DuckDB, QuestDB, ClickHouse** against **Pandas** across 5 tick workloads with **1.05M quotes**
- Built deterministic verification oracle enforcing strict float tolerances (**1e-12**) to ensure exact accuracy
- Demonstrated **19.5x compute speedups** via **DuckDB**, leveraging sorted row-groups to skip data partitions
- Validated order book state integrity, resolving boundary leaks using monotonic sequence IDs & timestamping

Lock-Free MPMC Queue | *Self Project* | *Low-Latency C++20* *(Aug '25 - Nov '25)*

- Architected high-throughput **MPMC queue** for UDP feeds, strictly isolating network I/O from payload parsing
- Implemented **C++20 lock-free ring buffer** utilizing **CAS atomics** & memory barriers to block race conditions
- Eliminated OS-level thread blocking via per-slot sequence numbers, ensuring highly concurrent memory access
- Profiled latency via **Python**, slashing median wait times by **56%** and p99 tail latency to **25µs**

Chloros User-Level Threads | *Self Project* | *C, x86-64 Assembly* *(Jan '26 - Aug '26)*

- Programmed a cooperative user-level thread scheduler in **C**, multiplexing contexts without kernel preemption
- Engineered custom context switches in **x86-64 assembly**, saving callee registers and FP state
- Enforced strict **System V ABI** compliance by computing precise 16-byte padded stack alignments
- Validated scheduler integrity across **64 concurrent threads** and deep 1000-frame recursive stacks

Lock-Free Count-Min Sketch | *Self Project* | *C++, Atomics, BusTub* *(Jan '26 - Aug '26)*

- Constructed a lock-free **Count-Min Sketch in C++** with fast atomic trackers for concurrent frequency evaluation.
- Streamlined concurrent operations **2.16×** beyond a mutex standard, eclipsing the **1.2× performance goal**.
- Programmed leak-free methods and deterministic TopK/Merge/Reset; passed **13/13 cases** using **ASAN/LSAN**.

Dental Crown Marketplace MVP | *Self Project* | *React Native, Next.js, PostgreSQL* *(Jan '26 - Aug '26)*

- Engineered a **zero-server-overhead direct file-streaming pipeline** to anonymous storage endpoints, handling **100MB+ binary CAD scans** via direct client-to-host multi-part uploads
- Mitigated concurrent job acceptance race conditions utilizing **Prisma ORM** row-level database locking logic
- Dispatched real-time job broadcasts via **Firebase Cloud Messaging**, replacing WebSockets to slash overhead
- Secured manufacturing accountability by tracking every state transition within an **immutable SQL audit ledger**

Positions of Responsibility

Teaching Assistant: *DS203: Programming for Data Science & EPGD, IIT Bombay* *Jan '26 - Aug '26*

- Automated evaluation scripts & allocated cloud credits, streamlining grading for **110 students**
- Designed evaluation prompts against rubrics, managed grading metrics & reviewed notebooks

System Administrator: *CMInDS Department, IIT Bombay* *Jul '24 - Dec '25*

- Deployed **OSTicket**, new features to Interview Portal & Research portals to centralize digital department services
- Engineered automated backups and maintained infrastructure stability for continuous operations

Placement Representative: *Indian Institute of Technology Tirupati* *Jul '21 - Jun '22*

- Facilitated recruitment for **170+ students** by coordinating logistics & talks, securing vital industry partnerships

Technical Skills

Languages	Python, C/C++, JavaScript, Java, Bash, SQL, Markdown
ML & Data Science	PyTorch, TensorFlow, JAX, Scikit-Learn, Keras, OpenCV, NumPy, Pandas, SciPy
Web & Utilities	Django, Spring Boot, React.js, Flask, Matplotlib, Seaborn, BeautifulSoup, Selenium
Tools & Platforms	Git, Docker, AWS, Linux, MATLAB, LaTeX, Pygame, p5.js, InkScape, Procreate

Extracurricular Activities

- Active in **Drawing**, **Table Tennis**, and **Brand Logo Designing**
